EDUCATION

BTech

Lovely Professional University (II year dropout)

05/2019 - 09/2020

8.1 GPA

Intermediate

Adarsh Gyanodaya Vidyalaya

04/2016 - 03/2018

76%

PERSONAL PROJECTS

CRUD RESTful API (2022)

- Built a CRUD RESTful API using **Java**, **MySQL**, **Springboot**, **JPA** and **Maven**. Learned how to create, read, update and delete from a database and also organised the code in **MVC**.

Personal Portfolio (2023)

- Built a **responsive** personal portfolio using **React**, **hooks** which showcases my overall profile including my skills, projects and much more.

Random Gift Picker (2021)

- An **HTML**, **CSS**, **JavaScript**, and **JQuery** project in which one can choose a gift for him/her randomly, and the choices are shuffled each time. Also, it wishes you after you picked a gift. Isn't it cool?

Weather App (2023)

- Built with **HTML**, **CSS**, and **JS**. Weather App fetches data from openweather **API** and shows the data (temperature, humidity etc) of a particular city.

Movie Review (2023)

- Like the name suggests it gets you the reviews for the movies you want through fetching **IMDB API**. This project is built with **HTML**, **CSS**, and **JS**. So whenever you're in a dilemma to watch a movie, just search it on this app and get your answer.

Unscramble App (2022)

- Created an engaging Android app with a word-forming game. Explored **intents**, **activities**, and **lifecycle** methods in **Android Studio**.
